Open letter

Dear Valued Customers,

First and foremost, Tam Tam Packaging Manufacturing Co., Ltd. would like to extend our warmest greetings and best wishes for your health and well-being.

Tam Tam Packaging Manufacturing is a leading manufacturer and supplier of plastic packaging products.

Our products are currently distributed across the entire Vietnamese market and exported to several countries worldwide.

Our main product lines include:

- Woven PP bags, PP jumbo bags, FIBC bags, Baffle bag, Clover bag, A/L Bag, Mesh bulk bag, Conductive Bag, etc.
- Agricultural mesh bags, anti-static bags, etc.
- PP jumbo bags with inner PE liners, Aluminium liners, etc.
- PP fabric, PP belts, etc.

With a highly skilled and experienced team of managers and workers, along with a modern and well-equipped machinery system, our company consistently delivers high-quality products that meet the diverse needs of the market. We are committed to providing fast, efficient, and timely service at competitive prices. At the same time, we continuously foster innovation through the application of advanced technologies and the promotion of technical initiatives. By actively listening to customer feedback and exchanging industry insights, we are dedicated to improving and delivering the best possible products to our clients.

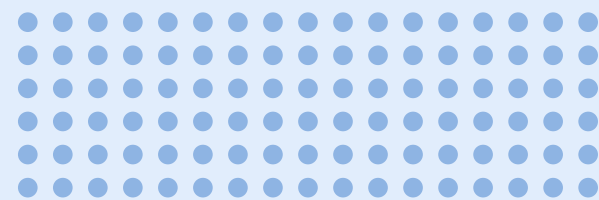

We warmly welcome you to visit and experience our professional and dedicated service.

Sincerely,

Tam Tam Packaging Manufacturing Co., Ltd.

1. Yarn extruder

Yarn is produced on a modern imported extrusion line using a closed-loop process. Materials include virgin plastic resin, color masterbatch, additives, and UV stabilizers. The finished yarn is durable and UV-resistant, with a daily capacity of 7-10 tons.

2. Weaving

With a fleet of 12 advanced weaving machines, all newly imported from reputable suppliers, we have the capability to produce woven fabric sheets up to 2160mm in width

3. Belt weaving

Using modern strapping machines, we manufacture PP belt with widths ranging from 20mm to 100mm to meet diverse customer needs.

4. Cutting

The automatic thermal cutting machine lines enable high-precision and efficient cutting, achieving high production output.

5. Flexo printing

Using 2-color and 3-color Flexo printing machines, we deliver consistent quality with sharp details.

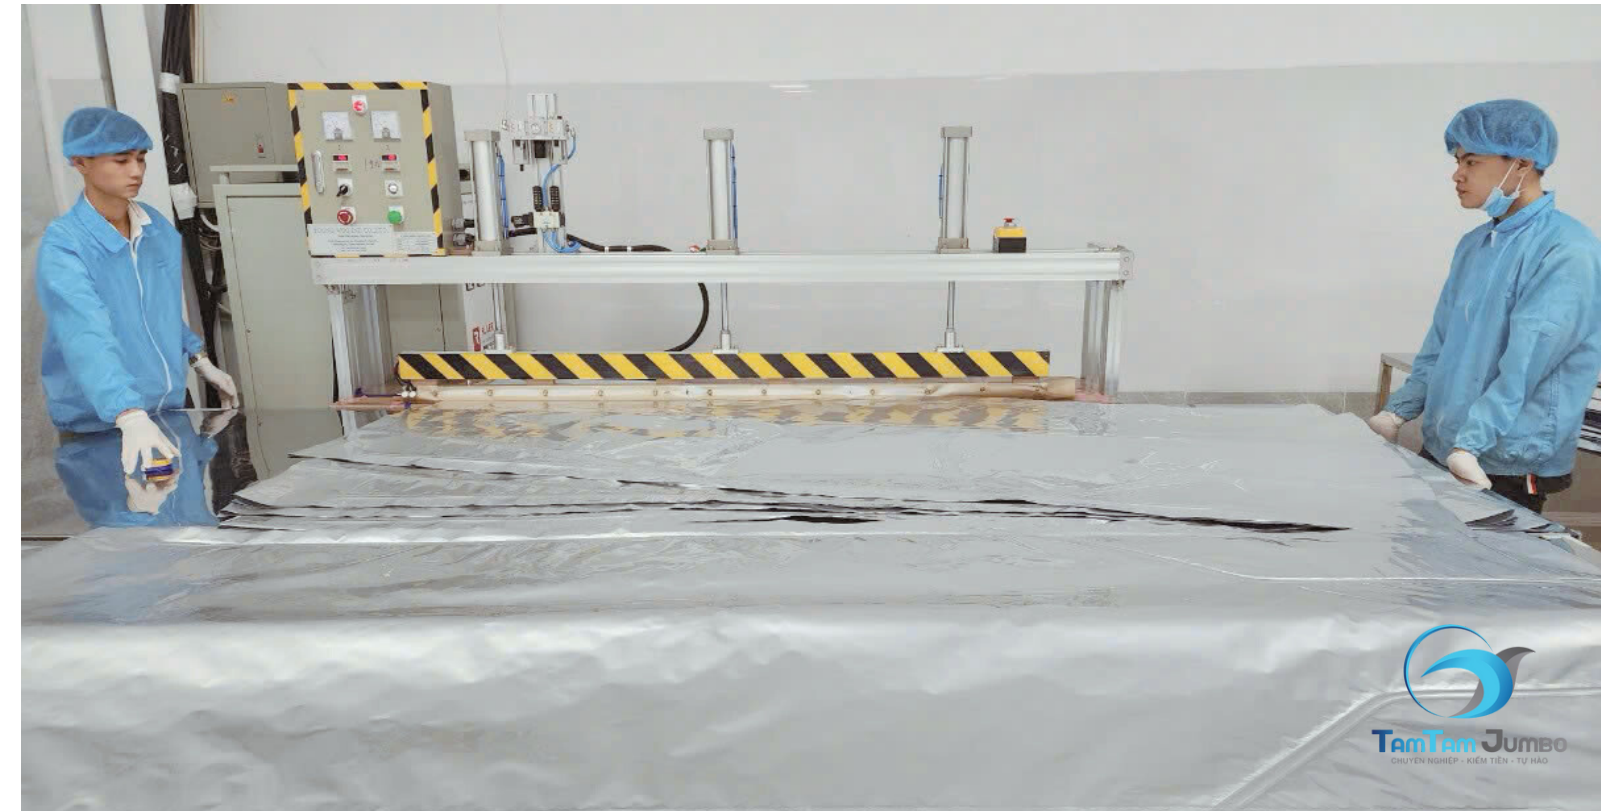

6. Sewing final product

Our closed-loop process, supported by a skilled sewing team with extensive experience, ensures high-quality products that meet customer requirements.

7. Sealing liner

Carry out the processes of cutting and sealing plastic films such as PE film and Aluminum film on bottle necks. Ensure airtightness, adhesion, and compliance with technical requirements according to production standards.

8. Packing and bailing

Products that have passed quality inspection will be packed according to customer requirements. Our high-capacity packing machines can maximize the number of products loaded into a container, thereby reducing logistics costs.

9. Air Blowing (Cleaning)

The air blowing process is performed to remove dust and impurities from the inside of the packaging, ensuring cleanliness and safety before proceeding to the next packaging stages.

10. Packing and bailing

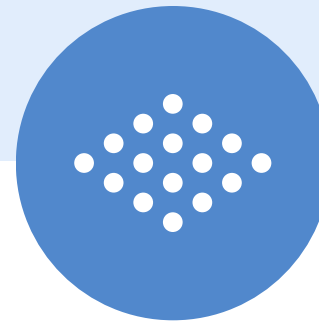

Products that have passed quality inspection will be packed according to customer requirements. Our high-capacity packing machines can maximize the number of products loaded into a container, thereby reducing logistics costs.
